Chief Justice John Roberts
1 First Street, NE
Washington, DC 20543

Dear Chief Justice Roberts,

I hope you know that what remains of your legacy as well as the efficacy of your Court are at stake. The Citizens United decision, coupled with the more recent immunity you granted Donald Trump have put the country on the ropes. Horrible, democracy destroying decisions!

Now, the Republican dominated Congress has completely surrendered to the madness at the helm and will follow in lock step any decree of the Executive Branch. So, do we still have even two remaining branches of government in the United States? One wonders under your leadership if we will have even that in the judiciary branch.

The Constitution makes it pretty clear to any intelligent reader that the purse strings are in the hands of Congress. They create programs and appropriate the money to operate same. But now we have a president (I cannot bring myself to use capital letters anymore when referring to the presidency) who ignores the laws our constitution clearly states he is to enforce. It appears likely the Court majority, if past performance is any indication, will be fine with anything Trump does and so my conclusion is that we are about to have but one functioning branch and what a bizarre and frightening branch it has become!

Hypothetically, what would happen if you and two other Republican appointees on the Court developed a spine and decided to preserve what is left of rule of law with a decision that stated the obvious - programs and appropriations Congress created cannot be arbitrarily demolished by the Executive Branch and Elon Musk. Enforcement of your decision would depend on Marshals employed by the Justice Department which is currently staffed by Trump loyalists.

My question to you is what would **you** do in the Constitutional Crisis that would result when the current Justice Department ignores your ruling? My second question is what would you advise Americans who love their country do to preserve their liberties when the current Justice Department” balks?
